Hi Jay,  
I hope you had a great weekend too!  
We appreciate the email and updates on all aspects of our conversation along with your support for the project.  
When you asked about the other land, which of these 3 areas below were you referring to so I can discuss it with my partner.

And sounds good on your barn project. I am here to help whenever you are ready :)  
Andrew

Hi Andrew,  
I'm sort about not getting back to you.  
Good luck with the planning board next Tuesday.  
I will probably join the zoom.  
I support your project.  
Let's talk about the land that abuts us.  
I would like to see if you are will to sell so I could add that to the conservation easement.  
I'm glad that you and Carrie came back to Portsmouth tick free.  
They are always working to " feed on us"  
Have a good weekend!  
btw I'm planning on cutting down some trees near the barn to allow for better exposure and safety to my building.  
Let's talk about that in the near future.

Thanks Jay

Thanks Jay,  
After review of your CMP bill, you use about 15,000 kWhs a year. Based on the available roof space and the impact of the trees lining the driveway, you could likely offset about 1/2 of that total based on this layout.  
<image.png>

I attached a shade report as well for you to look at.  
Let me know if you have any feedback or want to see a ground mount option, which will have some shade impact as you can see by the above picture.  
Regards,  
Andrew
